1. Key Responsibilities

WordPress Development & Maintenance

- Maintain and support a portfolio of WordPress sites built on custom themes.
- Develop, customize, and troubleshoot WordPress plugins to extend site functionality.
- Perform ongoing website updates, upgrades, and general maintenance.
- Redesign and improve site presentation, layout, and user experience.
- Write clean, maintainable PHP and MySQL code, and solid frontend HTML/CSS.

AWS Server Maintenance

- Maintain and monitor AWS Lightsail instances and EC2 servers.
- Perform routine server maintenance: updates, patching, backups, and troubleshooting.
- Diagnose and resolve server performance and uptime issues on WordPress/LAMP environments.

SEO

- Apply basic on-page SEO best practices during builds, redesigns, and updates.
- Ensure sites are technically optimized for search (page speed, structure, metadata).

2. Required Skills & Experience

- ✓ 5+ years professional experience in PHP and MySQL development.
- ✓ Deep, hands-on experience with WordPress, including custom theme work.
- ✓ Proven experience developing custom WordPress plugins.
- ✓ Practical experience maintaining AWS Lightsail instances and/or EC2 servers.
- ✓ Strong frontend skills: HTML5, CSS3, responsive design.
- ✓ Working knowledge of basic on-page SEO principles.
- ✓ Ability to independently manage updates, redesigns, and maintenance across multiple sites.
- ✓ CSS knowledge for building, customizing, and optimizing responsive, modern designs.

3. Nice to Have

- Experience with LAMP stack administration beyond Lightsail/EC2 (e.g., broader AWS services).
- Familiarity with version control (Git) and staging/deployment workflows.
- Basic understanding of website security and SSL setup.
- Experience with page builders (WPBakery, Elementor, etc.) alongside custom theme development.

4. What We Offer

- Competitive salary commensurate with experience.
- Flexible / remote working arrangement.
- Ownership of a varied portfolio of live WordPress projects.
